Project Description

The purpose of this project is to design a database system and turning it into a website for a project of Eksim Holding. The name of the project is "Request Portal" and the chosen database system technology is MSSQL. After creating a database system for the project, every employee of this company will be able to enter different kind of requests. These requests will be sent to managers of the employee and it will be approved or rejected. Employee will see the state of his/her request. Firstly, we used MSSQL to implement the database. After determining the entities and their relationships, we first draw a mapping diagram and then we built our database system. In the next step of the project, we will be creating our web project for this database system.

Scope

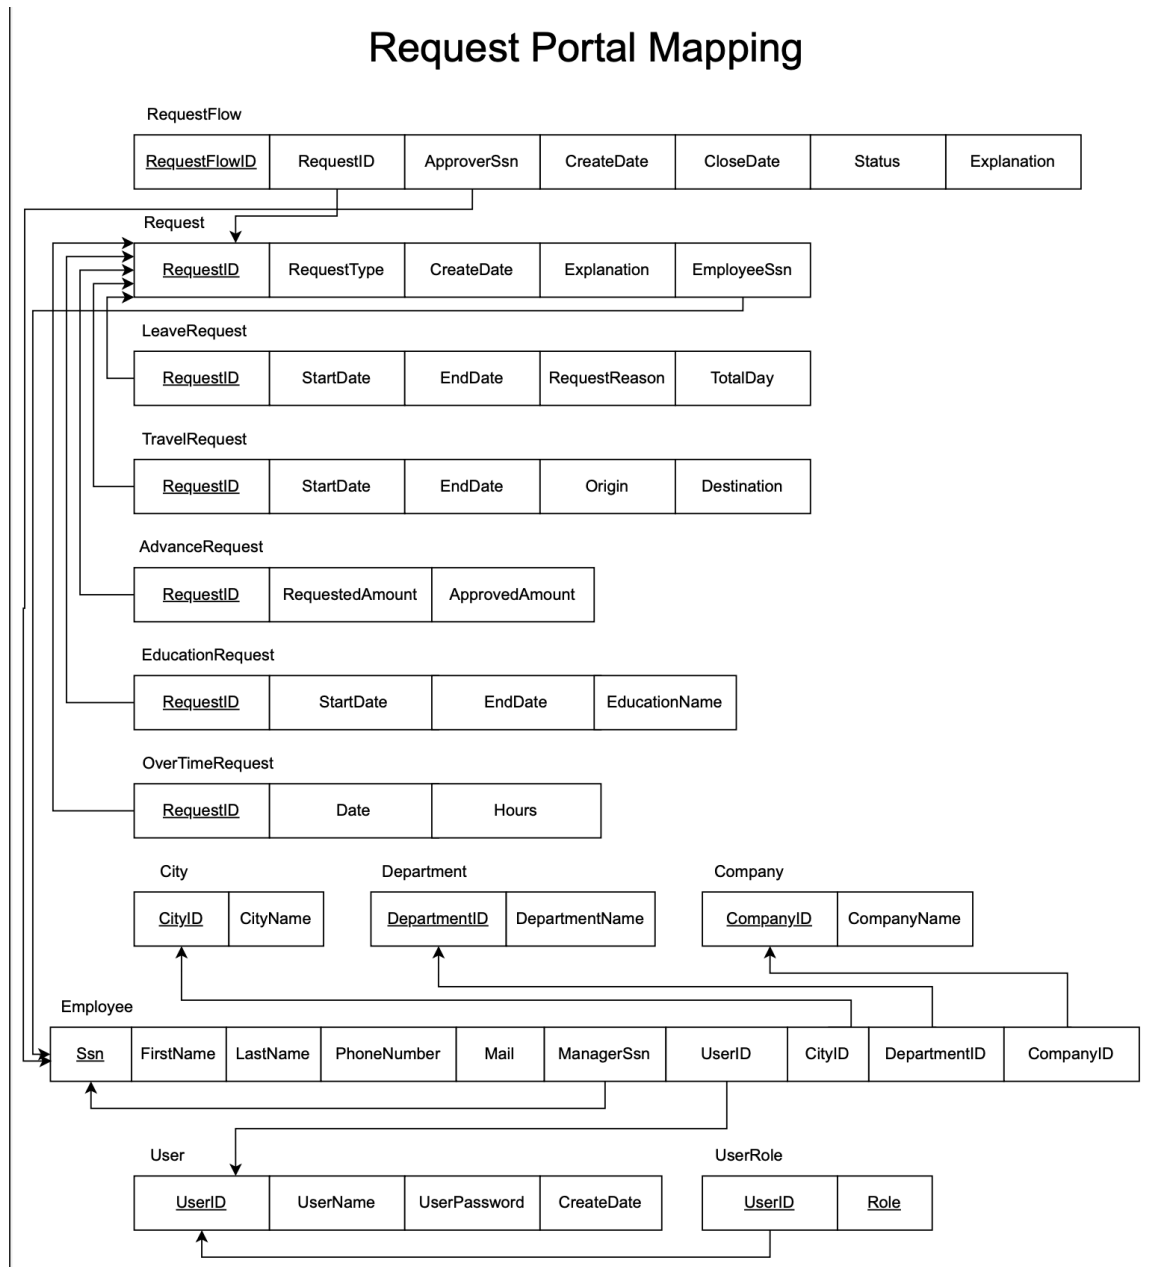

With this project idea, Eksim Holding employees will be able to send their request to their managers. In addition, all employee related informations will be kept via this database and can be controlled easily. All business processes will be included from our Requirement Analysis Report document. While implementing the database system in MSSQL, we tried to apply all business processes but also we will also have some of them in our web project.

Entities & Definitions

- City: Cities in Turkey where employees live.
- Department: Departments of the Eksim that employees work
- Company: Eksim Holding owns many companies and each employee works in one of these companies.
- User: User information for each employee to login to the Request Portal.
- Request: General informations stored in the Request entity for each request of the employees like create date of the request and explanation of the request.

- RequestFlow: Each request has a flow that contains when it's submitted to an approver and when it's accepted or rejected with an explanation.
- LeaveRequest: This is for employee leave requests.
- TravelRequest: This is for employee travel requests.
- AdvanceRequest: This is for employee advance requests.
- EducationRequest: This is for employee education requests.
- OverTimeRequest: This is for employee over time requests.

Using these entities we drew a mapping as in below:

With this drawing we decided our tables and their relationships. All tables, primary and foreign keys can be seen in this drawing.

Tables

City

Description: It stores cities of Turkey.

Column Name	Data Type	Properties
CityID	int	Primary Key, Identity(1, 1)
CityName	nvarchar(50)	

Department

Description: It stores departments of the Eksim Holding.

Column Name	Data Type	Properties
DepartmentID	int	Primary Key, Identity(1, 1)
DepartmentName	nvarchar(50)	

Company

Description: It stores companies of the Eksim Holding.

Column Name	Data Type	Properties
CompanyID	int	Primary Key, Identity(1, 1)
CompanyName	nvarchar(50)	

Users

Description: It stores user login information of the employees.

Column Name	Data Type	Properties
UserID	int	Primary Key, Identity(1, 1)
UserName	nvarchar(25)	
UserPassword	nvarchar(25)	
CreateDate	smalldatetime	

UserRole

Description: It stores user role information of the users.

Column Name	Data Type	Properties
UserID	int	Foreign Key References Users (UserID)
UserRole	nvarchar(25)	

Employee

Description: It stores user role information of the users.

Column Name	Data Type	Properties
Ssn	int	Primary Key
FirstName	nvarchar(25)	
LastName	nvarchar(25)	
PhoneNumber	nvarchar(15)	
Mail	nvarchar(50)	
ManagerSsn	int	Foreign Key References Employee (Ssn)
UserID	int	Foreign Key References Users (UserID)
CityID	int	Foreign Key References City (CityID)
DepartmentID	int	Foreign Key References Department (DepartmentID)
CompanyID	int	Foreign Key References Company (CompanyID)

Request

Description: It stores employee requests.

Column Name	Data Type	Properties
RequestID	int	Primary Key, Identity (1, 1)
RequestType	tinyint	
CreateDate	smalldatetime	Default Current_Timestamp
Explanation	nvarchar(250)	
EmployeeSsn	int	

RequestFlow

Description: It stores employee requests's flows.

Column Name	Data Type	Properties
RequestFlowID	int	Primary Key, Identity (1, 1)
RequestID	tinyint	Index IX_RequestID Nonclustered, Foreign Key References Request (RequestID)
ApproverSsn	int	Foreign Key References Employee (Ssn)
CreateDate	smalldatetime	Default Current_Timestamp
CloseDate	smalldatetime	
Status	tinyint	
Explanation	nvarchar(250)	

LeaveRequest

Description: It stores extra informations of leave requests.

Column Name	Data Type	Properties
RequestID	int	Primary Key, Foreign Key References Request (RequestID)
StartDate	smalldatetime	
EndDate	smalldatetime	
RequestReason	nvarchar(250)	
TotalDay	int	Computed Column As Datediff(day, StartDate, EndDate)

TravelRequest

Description: It stores extra informations of travel requests.

Column Name	Data Type	Properties
RequestID	int	Primary Key, Foreign Key References Request (RequestID)
StartDate	smalldatetime	
EndDate	smalldatetime	
Origin	nvarchar(50)	
Destination	nvarchar(50)	

AdvanceRequest

Description: It stores extra informations of advance requests.

Column Name	Data Type	Properties
RequestID	int	Primary Key, Foreign Key References Request (RequestID)
RequestedAmount	smallmoney	Check (RequestedAmount > 0)
ApprovedAmount	smallmoney	Check (ApprovedAmount >= 0)

EducationRequest

Description: It stores extra informations of education requests.

Column Name	Data Type	Properties
RequestID	int	Primary Key, Foreign Key References Request (RequestID)
StartDate	smalldatetime	
EndDate	smalldatetime	
EducationName	nvarchar(150))	

OverTimeRequest

Description: It stores extra informations of over time requests.

Column Name	Data Type	Properties
RequestID	int	Primary Key, Foreign Key References Request (RequestID)
Date	smalldatetime	
Hours	int	

Views

GetRequestWithFlow_View

Definition: It gets requests with flow informations.

Code & Output:

```
CREATE VIEW GetRequestWithFlow_View AS
SELECT
    r.RequestID,
    r.RequestType,
    r.EmployeeSsn,
    r.CreateDate AS 'RequestCreateDate',
    r.Explanation AS 'RequestExplanation',
    rf.RequestFlowID,
    rf.ApproverSsn,
    rf.CreateDate AS 'FlowCreateDate',
    rf.CloseDate AS 'FlowCloseDate',
    rf.Explanation AS 'FlowExplanation',
    rf.Status AS 'FlowStatus'
FROM Request r
JOIN RequestFlow rf
ON r.RequestID = rf.RequestID;
```

11 | SELECT * FROM GetRequestWithFlow_View

5	22	2	2022-12-30 17:46:00	Seyahat ihtiyacim bulunmaktadır.	23	2023-01-06 00:00:00	2023-01-13 00:00:00	Ankara	Adana

GetAdvanceRequest_View

Definition: It gets advance requests.

Code & Output:

```
CREATE VIEW GetAdvanceRequest_View AS
SELECT
    r.*,
    ar.RequestedAmount,
    ar.ApprovedAmount
FROM Request r
JOIN AdvanceRequest ar ON ar.RequestID = r.RequestID
WHERE r.RequestType = 3;
```

The screenshot shows a SQL query being executed in a query editor. The query is: `SELECT * FROM GetAdvanceRequest_View`. Below the query, the 'Results' tab is active, displaying a table with 5 rows and 7 columns. The columns are: RequestID, RequestType, CreateDate, Explanation, EmployeeSsn, RequestedAmount, and ApprovedAmount. The data shows five advance requests, all with RequestType 3, created on 2022-12-30 17:46:00. The explanations are 'Avans ihtiyacim bulunmaktadır.' for each request. The requested amounts are 100.00, 200.00, 300.00, 400.00, and 500.00 respectively. The approved amounts are all NULL.

	RequestID	RequestType	CreateDate	Explanation	EmployeeSsn	RequestedAmount	ApprovedAmount
1	3	3	2022-12-30 17:46:00	Avans ihtiyacim bulunmaktadır.	22	100.00	NULL
2	8	3	2022-12-30 17:46:00	Avans ihtiyacim bulunmaktadır.	21	200.00	NULL
3	13	3	2022-12-30 17:46:00	Avans ihtiyacim bulunmaktadır.	20	300.00	NULL
4	18	3	2022-12-30 17:46:00	Avans ihtiyacim bulunmaktadır.	25	400.00	NULL
5	23	3	2022-12-30 17:46:00	Avans ihtiyacim bulunmaktadır.	24	500.00	NULL

GetEducationRequest_View

Definition: It gets education requests.

Code & Output:

```
CREATE VIEW GetEducationRequest_View AS
SELECT
    r.*,
    er.StartDate,
    er.EndDate,
    er.EducationName
FROM Request r
JOIN EducationRequest er ON er.RequestID = r.RequestID
WHERE r.RequestType = 4;
```

The screenshot shows a SQL query being executed in a query editor. The query is: `SELECT * FROM GetEducationRequest_View`. Below the query, the 'Results' tab is active, displaying a table with 5 rows and 8 columns. The columns are: RequestID, RequestType, CreateDate, Explanation, EmployeeSsn, StartDate, EndDate, and EducationName. The data shows five education requests, all with RequestType 4, created on 2022-12-30 17:46:00. The explanations are 'Egitim talebi ihtiyacim bulunmaktadır.' for each request. The start and end dates are provided for each request, along with the education name: Excel Egitimi, PowerPoint Egitimi, Word Egitimi, Programlama Egitimi, and Kariyer Planlamasi Egitimi.

	RequestID	RequestType	CreateDate	Explanation	EmployeeSsn	StartDate	EndDate	EducationName
1	4	4	2022-12-30 17:46:00	Egitim talebi ihtiyacim bulunmaktadır.	23	2023-01-02 00:00:00	2023-01-09 00:00:00	Excel Egitimi
2	9	4	2022-12-30 17:46:00	Egitim talebi ihtiyacim bulunmaktadır.	22	2023-01-03 00:00:00	2023-01-10 00:00:00	PowerPoint Egitimi
3	14	4	2022-12-30 17:46:00	Egitim talebi ihtiyacim bulunmaktadır.	21	2023-01-04 00:00:00	2023-01-11 00:00:00	Word Egitimi
4	19	4	2022-12-30 17:46:00	Egitim talebi ihtiyacim bulunmaktadır.	20	2023-01-05 00:00:00	2023-01-12 00:00:00	Programlama Egitimi
5	24	4	2022-12-30 17:46:00	Egitim talebi ihtiyacim bulunmaktadır.	25	2023-01-06 00:00:00	2023-01-13 00:00:00	Kariyer Planlamasi Egitimi

GetOverTimeRequest_View

Definition: It gets over time requests.

Code & Output:

```
CREATE VIEW GetOverTimeRequest_View AS
SELECT
    r.*,
    otr.Date,
    otr.Hours
FROM Request r
JOIN OverTimeRequest otr ON otr.RequestID = r.RequestID
WHERE r.RequestType = 5;
```

The screenshot shows a SQL Server Enterprise Manager interface. At the top, a query window displays the command: `SELECT * FROM GetOverTimeRequest_View`. Below the query window, the 'Results' tab is active, showing a table with 8 columns: RequestID, RequestType, CreateDate, Explanation, EmployeeSsn, Date, and Hours. The table contains 5 rows of data, all with RequestType = 5. The first row is highlighted.

	RequestID	RequestType	CreateDate	Explanation	EmployeeSsn	Date	Hours
1	5	5	2022-12-30 17:46:00	Mesai talebi ihtiyacim bulunmaktadır.	24	2023-01-02 00:00:00	1
2	10	5	2022-12-30 17:46:00	Mesai talebi ihtiyacim bulunmaktadır.	23	2023-01-03 00:00:00	2
3	15	5	2022-12-30 17:46:00	Mesai talebi ihtiyacim bulunmaktadır.	22	2023-01-04 00:00:00	3
4	20	5	2022-12-30 17:46:00	Mesai talebi ihtiyacim bulunmaktadır.	21	2023-01-05 00:00:00	1
5	25	5	2022-12-30 17:46:00	Mesai talebi ihtiyacim bulunmaktadır.	20	2023-01-06 00:00:00	2

GetEmployee_View

Definition: It gets employee informations.

Code & Output:

```
CREATE VIEW GetEmployee_View AS

GetUserRole_View

Definition: It gets user login and role informations.

Code & Output:

```
CREATE VIEW GetUserRole_View AS
SELECT
    u.UserID,
    u.UserName,
    u.UserPassword,
    u.CreateDate,
    ur.Role
FROM Users u
JOIN UserRole ur
    ON u.UserID = ur.UserID;
```

25 | `SELECT * FROM GetUserRole_View`
